

MLS® Laser Therapy Delivers Non-Invasive Alternative to Pain Relief and Fast Postsurgical Recovery

Next-generation MLS® Laser Therapy from [Cutting Edge Laser Technologies](#) alleviates pain, reduces inflammation, promotes healing and restores mobility. This breakthrough technology offers a new revenue stream, and a clinically validated, non-invasive, drug-free way to help patients suffering from chronic pain and injury.

I discovered I could treat some of our most difficult patients without the need for invasive procedures; that's when I decided to add it to my practice
— Marc Pietropaoli, M.D., Victory Sports Medicine & Orthopedics.

MLS Laser Therapy uses a state-of-the-art robotic delivery system to safely and effectively treat a wide range of conditions, including arthritis, back pain, neck pain, shoulder pain, sprains and strains. Physicians report the device yields patient satisfaction and excellent return on investment with predictable, repeatable and long-lasting results. This therapy solution promotes faster post-surgical healing and also offers:

- A cash-pay revenue stream with no pre-authorization, billing or collections
- An alternative to dangerous prescription pain medication
- Demonstrated pain relief in up to 90% of patients treated
- An appealing self-pay option compared to PRP and stem cell therapy

Built on a 30-year foundation of [scientific research](#), the patented MLS pulse-pattern laser has been proven safe and effective, with high patient satisfaction, a new revenue stream, and rapid ROI for orthopedic practices. To review Cutting Edge Laser Technologies article [click here](#).
