

Learn ultrasound at a 1-day course

Curious about how you can use ultrasound in your practice? Clarius has partnered with Dr. Marc Salzman, MD, FACS to bring you a 1-day introductory course, which will include hands-on scanning with live models.

Ultrasound can assist plastic surgeons with procedures such as:

- Ultrasound surveillance of breast implants
- Diagnosis and aspiration of abdominal and breast seromas
- Ultrasound guided TAP block & Pectoralis block
- Ultrasound guided fat grafting

And if you decide to buy a Clarius scanner after attending the course, we'll deduct the cost of the course from the scanner price.

About Dr. Salzman

Dr. Salzman, MD, FACS is a board-certified plastic surgeon and has been practicing in Louisville, Kentucky since 1992. He has extensive education experience, having taught medical courses to physicians, nurses, and paramedical cosmetologists and lectured around the US on his innovative techniques. He lectures plastic surgery residents at the University of Louisville twice a month, where he has been twice voted Educator of the Year.

“I have tried many scanners, but this has exceeded my expectations. It is wireless, a key feature for a surgeon, with great resolution. But even more exciting is the staff’s willingness to work with specialists to better serve our needs.”

Ricardo Rodriguez, MD
Baltimore Plastic Surgery

Wireless Ultrasound

Clarius scanners bring high-quality ultrasound imaging to a handheld device.

Automated imaging

We adjust the scanning settings based on your workflow, so you always get a clear image to see the details you need to see. You don’t have to spend time fiddling with settings—they’re optimized for your work.

Wireless

Have the freedom to scan where you need to. Clarius scanners are wireless and connect directly to your phone or tablet. Scan more comfortably without worrying about cords getting in the way.

Easy to sterilize

Clean our scanners with ease. Clarius scanners are rated IP67 and are fully submersible. They're also compatible with high-level disinfection solutions.

Easy exam management

Exams can be uploaded to Clarius Cloud, our online platform, where you can edit patient info, add annotations, and more. We've built in tools to make it easy to collaborate as well. Send exams to your colleagues for review, export them as PDFs, and discuss them through private comments.
