

VETSCAN Sediment Analyzer (SA)

Help your veterinary team save time and build strong client relationships with the cost-effective, two-part VETSCAN® urinalysis platform from Zoetis Petcare. The VETSCAN Sediment Analyzer (SA) streamlines manual urine sediment analysis workflow and helps decrease variation in urinalysis results. Combined with the integrated VETSCAN Urine Analysis (UA) for urine chemistry, the VETSCAN SA/UA is the complete solution for in-clinic, point-of-care urinalysis.

“I got excited about this machine when I saw it at a conference a couple years ago, and no one was doing what the Sediment Analyzer was doing, so I lobbied my boss to let us get it. In terms of consistency alone, the benefits of VETSCAN SA are huge.” – Jenny Veed, CVT, Inventory Manager/Lead Vet Tech, Merrick Animal Hospital, Brookfield, Illinois.

The automated VETSCAN SA avoids the learning curve and variability that can plague manual analysis, including factors such as volume of urine collected, urine examination, sample preparation, evaluation and storage. Additionally, the VETSCAN UA includes tests for the semi-quantitative measurement of blood, pH, glucose, ketones, protein, bilirubin, microalbuminuria and urine protein:creatinine ratio.

The VETSCAN SA/UA helps improve laboratory workflow and automate urine analysis testing for a complete, cost-effective and efficient result. The combined sediment report and urine chemistry is available on the integrated workstation within minutes, allowing urine to be examined quickly after collection using a smaller sample volume without requiring centrifugation.

“Whenever we performed a manual, UA it took a long time to get the tests completed. The VETSCAN SA and UA improved our workflow. Plus, it tells us

what kind of crystals, casts or other particulates we might be dealing with.” –
Janet Linton, DVM, Owner, Belleville Animal Clinic

The VETSCAN Sediment Analyzer (SA) and Urine Analyzer (UA) delivers accuracy and high-quality results at the point of care. For more information about how the VETSCAN SA/UA can help your veterinary practitioners deliver better patient care with consistency, efficiency and reliability, visit VMX booth No.
