Medco Forum Presents: SEDASYS®

The Computer-Assisted Personalized Sedation System

Procedural sedation is an important part of healthcare, enhancing the quality of a procedure by managing a patient's periprocedural fear, pain, and anxiety. The SEDASYS® System is a Computer-Assisted Personalized Sedation (CAPS) system that is a new option for physician-led (e.g. gastroenterologist) teams providing sedation.

The SEDASYS® System is indicated for the intravenous administration of 1% (10 mg/mL) propofol injectable emulsion for the initiation and maintenance of minimalto-moderate sedation, as defined by the American Society of Anesthesiologists (ASA) Continuum of Depth of Sedation, in ASA physical status I and II patients ≥18 years old undergoing colonoscopy and

SEDASYS® System is a Computer-Assisted Personalized Sedation (CAPS) System

esophagogastroduodenoscopy (EGD) procedures.

Developed by Anesthesiolgists

The System was developed with input from experts in the field of anesthesiology, anesthetic pharmacology, patient safety, drug administration technology, patient monitoring, human factors engineering, gastroenterology and nursing.

The System integrates patient monitoring that adheres to the ASA guidelines for safe sedation by nonanesthesiologist and propofol infusion that follows the dosing guidelines for sedation in the FDA-approved propofol labeling.

Physician-led teams can safely and effectively administer minimal to moderate sedation using the SEDASYS® System while having a statistically increased level of satisfaction for the patient and the clinician. The SEDASYS® System is a new option for sedation that can help manage the current patient and physician demand for propofol.

ACG Educational Symposium

"An Introduction to the SEDASYS® Computer-Assisted Personalized Sedation System"

Monday, October 14, 2013
8:45 p.m. to 11:15 p.m.

Elizabeth Ballroom A & B, Manchester Grand Hyatt San Diego
1 Market Place, San Diego, CA

**For more information about the SEDASYS® SYSTEM,
please call 800-SEDASYS,
visit the "contact us page" at www.sedasys.com
or speak to a representative at the
ACG conference, Booth #221.**
